

# seq in seq, seqDefault and seqReset

copied: 1, 2, 3. Reset. 1, 2, 3.

## *simple use of seq*

First seq: 1

Second seq: 2

We have just done a `<seqReset"/>`

First seq after seqReset: 1

second seq after seqReset: 2

If you are going to use multiple seq tags, you need to use the "id" attribute.

## *Better use of seq*

We have just done a `<seqDefault id="test"/>`

We have just done a `<seqReset id="test"/>`

First seq: 1

Second seq: 2

We have just done a `<seqReset id="test"/>`

First seq after seqReset: 1

second seq after seqReset: 2

## *Using two seqs independently*

We have just done a `<seqReset id="testOne"/>`

We have just done a `<seqReset id="testTwo"/>`

First seq for testOne: 1

Second seq for testOne: 2

First seq for testTwo: 1

Second seq for testTwo: 2

We have just done a `<seqReset id="testOne"/>`

First seq after seqReset for testOne: 1

second seq after seqReset for testOne: 2

First seq after seqReset for testTwo: 3

second seq after seqReset for testTwo: 4

Notice how resetting testOne doesn't affect testTwo at all.
